EU Blue Card holder — eligible for a German EU Blue Card via EU long-term mobility (12-month rule met)

Summary

Senior Software Engineer with **7+ years** building high-traffic web platforms for European companies, with deep expertise in **React**, **Next.js**, **Angular**, **SvelteKit**, and **TypeScript**. Actively expanding across the stack with **Node.js**, **NestJS**, **Python (FastAPI)** and **Java Spring Boot**. Hands-on experience shipping **LLM/AI features** to production (OpenAI, Gemini, Vertex AI, LangChain, RAG) and running local models with Ollama and LM Studio. Founder of **Rahyab Mohajer** — a microservices platform with a live web app and React Native iOS/Android apps. **EU Blue Card holder** since Oct 2024 (valid until Dec 2027): eligible for a German EU Blue Card via the EU long-term mobility route — visa-free entry, 12-month requirement already met. Targeting engineering roles in NRW (Düsseldorf, Cologne) and across Germany.

Skills

Frontend: React, Next.js, Angular, SvelteKit, TypeScript, JavaScript (ES6+), Tailwind CSS, shadcn/ui, SCSS

Backend: Node.js, Express, NestJS, Python (FastAPI), Java (Spring Boot 3), REST APIs, GraphQL, WebSockets

Mobile: React Native (iOS & Android), Progressive Web Apps (PWA)

Architecture: Microservices, SSR/SSG, API Design, BFF, System Design

AI / LLM: OpenAI API, Gemini, Vertex AI (GCP), LangChain, LangGraph, RAG, AI Agents, MCP, Ollama, LM Studio, pgvector

AI Tools: Claude Code, Cursor, GitHub Copilot, Antigravity

Databases & Caching: PostgreSQL, MySQL, Prisma, Drizzle ORM, Redis

DevOps & Cloud: Docker, Docker Compose, CI/CD (GitHub Actions), Linux (VPS administration), GCP, AWS S3, Cloudflare, Azure

Testing: Vitest, Jest, React Testing Library

Tools & Ways of Working: Git/GitHub, Jira, Figma, Agile/Scrum, Code Reviews, Technical Mentorship (20% team output increase)

Other: Core Web Vitals, Accessibility (WCAG, ARIA), Localization (i18n), Feature Flags, State Management (Redux, Zustand, React Query), Performance Optimization

Work Experience

Air France–KLM (KLM Royal Dutch Airlines) — Budapest, Hungary / Amsterdam, Netherlands

Nov 2025 - Present

Senior Software Engineer - Hybrid

- Built a production-ready RAG platform in Next.js (POC now adopted as MVP), integrating multiple LLM providers — OpenAI, Gemini, Vertex AI (GCP), and local models via Ollama — with pgvector (PostgreSQL) for semantic retrieval.
- Implemented agentic AI form completion: a chatbot that fills a large, complex enterprise form through natural conversation, alongside semantic search over operational data.
- Integrated the AI platform with the Java backend, including full role-based access control (RBAC); set up CI/CD with GitHub Actions and Docker.
- Developed and maintained multiple internal applications across Angular, Next.js, Node.js, and Python in an agile (Scrum) setup with distributed Budapest–Amsterdam teams.

BimObject — Budapest, Hungary / Malmö, Sweden

Jul 2023 - Oct 2025

Software Engineer - Hybrid

- Engineered SvelteKit SSR applications with centralized authentication, managing secure access for 5M+ users.
- Drove 20% organic traffic growth (Google Search Console) by migrating to Angular Universal SSR, improving Core Web Vitals from “Poor” to “Good” across LCP, CLS, and FID.

-
- Delivered 20+ features for high-traffic platforms, increasing user engagement by 30%.
 - Built an internal AI developer tool (Next.js + OpenAI API) enabling natural-language access to internal documentation — adopted by the engineering team as a daily workflow tool.
 - Collaborated on backend API design, improving data-flow efficiency and system scalability.

Citronity — Vancouver, Canada

Oct 2021 - Jul 2023

Software Engineer - Remote

- Built 4 React applications and reusable UI libraries using Ant Design and Redux.
- Reduced page load time by 40% and halved reported UI bugs through refactoring and performance profiling (React DevTools, Lighthouse).
- Mentored junior developers and helped increase team output by 20%.

Hamimohajer — Tehran, Iran

Oct 2020 - Oct 2021

Frontend Developer

- Built React/Next.js dashboards integrated with 30+ REST APIs; improved app performance through profiling and React best practices.

Tadbir Hesab Mohaseban & Novin Tarh Gostaran — Tehran, Iran

Jun 2017 - Oct 2020

Frontend Developer

- Maintained and refactored React/SCSS codebases; led responsive design and cross-browser compatibility improvements.

Projects

Rahyab Mohajer — **Founder & Full-Stack Engineer** (Node.js, Express, Microservices, Next.js, React Native, PostgreSQL, Redis, Docker)

- Designed and built a community platform for the Iranian diaspora end-to-end: microservices backend (Node.js/Express, PostgreSQL, Redis), Next.js web app and PWA with a fully dynamic super-admin dashboard — live in production, self-hosted on a Linux VPS with Docker and GitHub Actions CI/CD.
- Developed cross-platform iOS and Android apps with React Native, sharing TypeScript logic with the web app (store release in preparation); reached 90% test coverage across frontend, backend and mobile.
- Integrated AI-powered translation in the backend, exposed public content to AI platforms via an MCP server, built image compression/conversion pipelines, and achieved a 100/100 Lighthouse score (SEO/performance) on the homepage.

AI Portfolio — **Personal AI-Powered Website** (Next.js, Redis, OpenAI, LangChain)

- Developed an AI-powered portfolio with dynamic LLM-driven interactions.
- Implemented caching and SSR for performance optimization.

Assistly — **AI Chatbot Platform** (Next.js, GraphQL, PostgreSQL, OpenAI, LangChain)

- Built a full-stack AI platform with authentication, real-time messaging and LLM-based responses; designed backend APIs with GraphQL and PostgreSQL.

IOPIE & NIKOLA — **IoT Energy Dashboard** (React, TypeScript, WebSockets)

- Built a real-time admin panel for industrial energy monitoring, handling live sensor data streams across 50+ device endpoints.

Education

MSc in Computer Science — **Óbuda University**, Budapest, Hungary

Sep 2022 - Aug 2024

GPA: 4.0/5.0

BSc in Computer Science — **Islamic Azad University (Hashtgerd Branch)**, Iran

Feb 2014 - Jul 2018

Languages

English — Professional (C1) · **German** — A1 (actively learning) · **Hungarian** — A2 · **Kurdish** — Native · **Persian** — Native
